Summary

Java Full Stack Developer with 2+ years of experience in backend development, REST API design, database programming, and enterprise application development using Java and Spring Boot. Experienced in building production-grade applications including CCTNS and PRISMA, with expertise in API integrations, complex SQL queries, reporting, dashboards, microservices, and production troubleshooting. Hands-on experience with Spring Security, Angular, Redis, and AI application integration using ChatGPT/OpenAI and Ollama.

Technical Skills

Languages: Java, Python, JavaScript, SQL

Backend: Spring Boot, Spring MVC, REST APIs, Microservices, Spring Security, Hibernate, JPA, JDBC

Databases: MySQL, PostgreSQL, MongoDB, Redis

Messaging: Apache Kafka, RabbitMQ

Frontend: Angular, HTML, CSS, JavaScript

AI: ChatGPT/OpenAI API, Ollama, AI Integration

DevOps Tools: Docker, Jenkins, Git, Maven, Tomcat, IntelliJ IDEA, Eclipse, STS, VS Code

Concepts: OOP, MVC Architecture, DSA, API Integration, Database Optimization, Distributed Systems

Experience

Safedot E-Solutions Pvt. Ltd., Panchkula

Jul 2024 – Present

Software Developer (Full Stack)

Jan 2025 – Present

Probation Period: Jul 2024 – Dec 2024

- Joined as a Backend Developer and contributed to production-grade government applications using Java, Spring Boot, REST APIs, SQL, MySQL, and Angular-based frontend integration.
- Developed backend services, business logic, database operations, REST APIs, reporting modules, and system integrations for government and police technology platforms. “

Project 1: CCTNS – Crime and Criminal Tracking Network Systems

- Developed and maintained backend services for the CCTNS platform supporting police operations, crime investigation, FIR and case management, criminal records, and investigation workflows.
- Implemented core investigation workflows covering FIR, GD, Arrest, Seizure, Investigation, IIF, and case-management processes using Java, Spring Boot, SQL, and REST APIs.
- Designed and developed RESTful APIs for data creation, retrieval, validation, processing, search, filtering, and integration across multiple CCTNS modules.
- Developed and maintained IIF 1-24 and operational reports including Zero FIR, FIR Search, ERSS-112, Property Seized & Recovery, Investigation Pendency, Criminal Dossier, Missing Person, Arrest Summary, Crime Against Women, Daily/Monthly Crime, Crime Data, and Crime Diary reports.
- Developed internal API integrations for data exchange between CCTNS and NCRB/government platforms including ICJS, e-Sakshya, I-MOT, and ITSSO.
- Implemented integration workflows for request validation, data transformation, synchronization, business-rule processing, and response handling across interconnected government systems.
- Built complex SQL queries and database operations for large-scale crime-data retrieval, filtering, aggregation, search, and report generation.
- Optimized SQL queries and backend processing for data-intensive reports and search operations to improve application response time and overall performance.
- Diagnosed and resolved production issues involving REST APIs, database queries, reports, system integrations, data synchronization, and application workflows. “

Project 2: PRISMA – Punjab Real-Time Information System for Monitoring and Analysis

- Developed backend services for PRISMA, a real-time crime-data monitoring and analytical platform supporting dashboards, operational monitoring, reporting, and data analysis.
- Developed RESTful APIs using Java and Spring Boot to retrieve, filter, aggregate, process, and transform CCTNS data for real-time dashboards and analytical use cases.
- Implemented backend logic for dashboards with summarized and drill-down views of crime statistics, police performance, investigation pendency, and operational metrics.
- Developed and maintained monitoring and analytical reports covering IIF, ERSS-112, crime statistics, investigation pendency, police performance, and other operational indicators.
- Developed Medleapr reports and intelligence-oriented data analysis features for identifying crime trends, patterns, and relationships from historical data.
- Contributed to PRISMA Intelligence features involving AI-based crime analysis and prediction using historical crime data to identify potential future crime trends and crime-head patterns.
- Implemented data validation, filtering, aggregation, business rules, and database processing for large datasets powering dashboards and analytical reports.

- Integrated Spring Boot REST APIs with Angular applications and contributed to end-to-end testing, debugging, performance optimization, and production issue resolution. ““

Internship

Full Stack Developer Intern – SkillDzire Nov 2023 – Apr 2024

- Developed full-stack web applications using Java, Spring Boot, REST APIs, MySQL, and frontend technologies.
- Developed REST APIs and integrated frontend components with backend services and databases. ““

Projects

Job Portal Platform – Full Stack

- Developing an Indeed/Naukri-inspired job portal using Java, Spring Boot, REST APIs, Spring Security, JWT, MySQL, Microservices, and Angular, featuring AI-based resume scoring and an integrated chatbot.

AI Chat Application – Ollama

- Developing a ChatGPT-style AI application using Ollama, Java Spring Boot, and Angular for conversational AI and real-time user interaction.

Bank Management System

- Developed a Spring Boot banking application with REST APIs, CRUD operations, transactions, and MySQL integration.

Email Spam Detection

- Developed a Python NLP model for spam classification using Naive Bayes and Logistic Regression.

Additional Projects: E-commerce Platform, Hospital Management System, Sign Recognition System, SQL Music Store Analysis

Education

B.Tech – S.V.C.E.T, Srikakulam (AP) 2020 – 2024

Certifications

- ““
- Full Stack Java Development – SkillDzire, 2024
 - Machine Learning with Python – Talent Shine, 2023 ““
